XCTrack
COMPANION

XCTrack PRO : probably the best flight APP

XCTrack is known as probably the best full featured flight computer for free flight pilots - both for leisure and competitions.

XCTrack Pro is an **advanced** version of XCTrack with new features that are not available in the "standard" version of XCTrack.

AIR³ is delivered "**Ready to fly**" with a customized and preconfigured version of XCTrack Pro (**perpetual licence**). Terrain (ground altitude) and maps are pre-installed according to the region of the distributor.

AIR³ Manager: ideal XCTrack companion APP

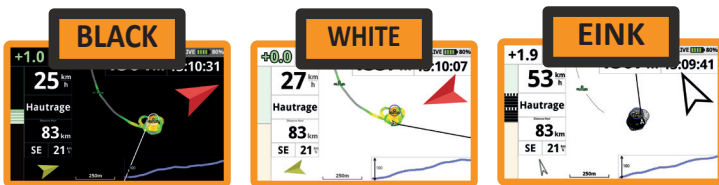

AIR³ Manager is the ideal XCTrack companion App.

By interfacing with XCTrack, you can easily choose your favorite theme and/or profile. AIR³ Manager will configure everything in XCTrack for you.

With AIR³ Manager, automatically get and transfer to XCTrack your validated Openair file so that it always uses the right airspace file.
